The Past Year to Start the New Year

The New Year brings a new chapter to LifeGuard Youth Development. We have come a long way over the past year and our newsletter has covered a multitude of topics. We've explored cyber bullying and secondary virginity. We brought you Keith Deltano and his striking message about youth and sex. Light was shed on teen trends and pregnancy and we brought a new insight on the dangers of pornography. Also in the past year, we've grown as an organization. Our name is becoming more well-known due to our new billboards and Facebook account. We also held a video contest where local youth demonstrated positive alternatives to at-risk behavior. But that's just the beginning!

A new Director of Education was appointed this year. Bethany Sullens comes to us from The Women's Clinic of Kansas City after serving as their Social Worker for a year and a half. Bethany is from Columbia, Missouri where she received her Master's Degree in Social Work and she also holds a Provisional License in Clinical Social Work.

We are excited to bring you another full year of helpful articles to better understand societal issues amongst teens. We have many new and motivating topics to bring new perspectives and awareness to our community. Look forward to topics such as *How to Say No to At-Risk Behaviors*, *Media Influences on Teens*, *Parenting Styles* and *Dealing with Rejection*.
